

Adaptation of social systems (Resiliencies)

Including infrastructure investments, use of substitutes and complements in production and/or consumption

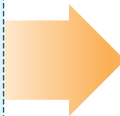

BioGeochemical + Ecosystem + Economic Space
Davis Strait/Baffin Bay and world markets

Biology

(Pandalus borealis)

Economics

(Greenland's shrimp industry and socio-economics)

**Ecosystem Services
Economic Rents
(Resiliencies)**

Flow of physical resources and their values (shrimp and ecologically or economically related factors, e.g. cod, tastes, labor)

External forcing

Drivers include temperature, ocean acidification, other climate changes

Fishery

Direct human drivers include demand and cost shifts, infrastructure investments, regulatory and management framework
